MEMORANDUM FOR THE HEAD AVIATION TRAINING RESOURCES SECTION
(N889F)

FROM: AWCM R.C. McGIFF
Aircraft Training Coordinator (N889F6)

Subj: EA-6B AIRCREW TRAINING REQUIREMENTS REVIEW (ATTR)
REPORT - ACTION MEMORANDUM

PURPOSE: Report findings of the EA-6B ATTR.

DISCUSSION: Per Attachment A, the EA-6B ATTR was held at NAS Whidby Island the week of 02 November 1998, to determine fleet requirements for planned skill progression of EA-6B pilots and NFO aircrew. Additionally, discussion concerning an effort to relocate the aviation electronic warfare training currently based at NTTC Corry Station under the Joint Aviation Electronic Warfare School (JAVEWS) to Whidby Island was discussed. This was the most contentious issue and required a subsequent separate meeting to further plan for the move. I had hoped the issues would be resolved to the point I could include them in the cover letter for the ATTR report, but such is not the case. To not delay the findings of the ATTR any longer, I recommend distributing the ATTR and addressing the JAVEWS move later. This was a productive conference with representatives from CNAP, VAQ-129 (FRS), Type Wings and fleet squadrons present. Enclosure (1) contains attendees.

- The FRS NITRAS data did not match their curriculum. Of their eight courses, none of the course lengths matched what they had entered into NITRAS. They now have a better understanding of NITRAS and our requirements for NITRAS reporting. They will provide updated inputs to CNAP in order to update NITRAS; we will then update OATMS data.

RECOMMENDATION: Approve letter promulgating the EA-6B ATTR Report and implementing action items.
